National Cotton Week Proves Huge Success For This Year

Survey Of Large Cities Reveal Cotton Week Was Observed With Great Success; War Uses Of Cottons Emphasized By Many Merchants

The nationwide observance of Cotton Week, which ended Saturday, yielded results that will have an important bearing on the merchandising of cotton goods in the post-war era, according to a survey by the Cotton-Textile Institute and National Cotton Council.

In all sections of the country, the response of consumers to retail presentations of spring-summer cotton products was encouraging. In no single instance did stores resort to scare promotions. In practically all cases, merchandising emphasis was on the wearability, washability and style appeal of cotton apparel and home furnishings.

In most cities sales were led by dresses, victory garden garments, work clothing and home furnishings. War uses of cotton were emphasized in those centers where shortages persist. Stores in these cities called attention to the ways in which billions of yards of cottons have been transformed from civilian articles into military material.

"It is clearly evident from the measure of support given this year's event—even in the face of wartime merchandising difficulties—that Cotton Week has a secure place on the retail merchandising calendar," according to Charles K. Everett, director of merchandising.

He added, "Just a preliminary check of Cotton Week advertising in the major cities across the country discloses the extraordinary measure of backing given Cotton Week. These advertisements clearly prove that cotton is experiencing the biggest season in its history. Our records also show more window space was devoted in last week than in any similar recent years."

WHITE OAK LOCAL NEWS

Little Miss Joan Ingold, daughter of Mr. and Mrs. Walter Ingold, is seriously sick at St. Leo's hospital. Her father was called home from the Naval Base in Maryland.

The many friends of Mrs. George Ward are grieved to learn of the death of her sister, Miss Mary Webb Nicholson, who was killed in an airplane accident in England.

Bernard Shepherd is at home from Trinidad after an absence of two years. There will be a fanning demonstration next Tuesday morning at 10:30 at the home of Mrs. Frank Morris, Hubbard street to which any one in the community is invited.

Miss Estelle Blain, New Bedford, Mass., is guest of Mr. and Mrs. Frank Starling on Seventeenth street.

Herman Smith, Freeman Field, Seymour, Ind., left Thursday after a week's leave at home with his parents, Mr. and Mrs. C. C. Smith.

Staff Sgt. Clayton Roberts arrived Friday from Trinidad after two years absence. After his furlough he will go to Camp Stewart, Ga.

Sgt. Cleo Mitchell, Stuttgart Field, Ark., is spending a short furlough at home.

Mrs. H. A. Morris and Mrs. T. A. Fruit and daughter, spent the week end in Gibsonville.

Pvt. Russel Horner, from Gunners school, Ft. Myers, Fla., is at home on a fifteen days furlough.

Sgt. Shade Lineberry left Sunday after a short stay at home. He is stationed at Ft. Jackson, S. C.

Mrs. Louise Lineberry Tucker is at home for a short stay. Lt. Tucker was transferred recently to Camp Davis.

Mrs. Otto Burnside returned last Friday from San Diego, Calif., where she went to visit her son, Lewis. Robert Ward spent Mothers day with them. She went the southern route and returned by way of Chicago.

Pvt. Howard Johnson returned to Ft. Lewis, Wash., after spending his fifteen days furlough with his parents, Mr. and Mrs. C. C. Johnson, 20th street.

Mrs. Branson Cockman has returned from Piedmont hospital where she had a tonsillar operation.

Mrs. Oscar Butler is a patient at St. Leo's hospital.

Mitchell Hicks is recovering from an operation at St. Leo's hospital and expects to come home tomorrow.

Mr. and Mrs. Ernest Stevens have moved to one of the Summit avenue apartments from Fourteenth street.

William Leonard Jr., has returned (Continued on Page Two)

by JAMES PRESTON

Present indications are that the bituminous coal controversy has been instrumental in forcing a national labor policy out of the welter of confusion on the manpower front. Plant seizure, stabilization, union behavior, wages, working conditions, strikes, slow-downs, fines, and imprisonment, subpoenas, cooling off, financial responsibility, secret ballots, the 48-hour week, and other phases of the problem are receiving consideration.

Interest centers around the Senate-approved Connolly Bill (S. 796) to amend the plant-seizure section of the Selective Service Act. The House Military Affairs Committee now has this measure and is planning speedy action.

Some sentiment also has been expressed among Committee members for substitution of the Anti-Strike Bill re-introduced at this session as H.R. 2124. There is some doubt, however, whether the Senate would be willing to accept this measure as a substitute for the Connolly Bill at this time; but some members of Congress believe the House can add some improving provisions to the latter measure which would be acceptable to the Senate and perhaps to the White House.

According to the WPB Planning Committee everyone will "suffer loss or, at best, discomfort" in 1943 because of a 15 to 20 percent curtailment in goods and services for civilians. The Committee suggests a program involving extension of consumer rationing, siphoning off of manufacturing activity in labor shortage areas, curtailing of less essential goods and services, standardization, and consumer education.

A new peak of \$708,000,000 in lend-lease activity reached during March sent the cumulative total of all lend-lease aid to \$10,319,518,000.

While Congress on all previous occasions has vigorously opposed any extensive business subsidy program and has refused to appropriate any funds for the purpose, the question is again an important Congressional issue. New developments indicate that the Administration will make a renewed demand for extensive subsidy legislation as a result of OPA's plans to force roll-backs on food prices—action sought by labor unions and promised by government officials.

On Monday, May 24, public hearing began in Congress on plans of various government agencies to change established industrial and business practices. The hearings and investigation will be conducted by a special seven-man House Interstate Commerce Subcommittee headed by Representative Lyle Boren of Oklahoma.

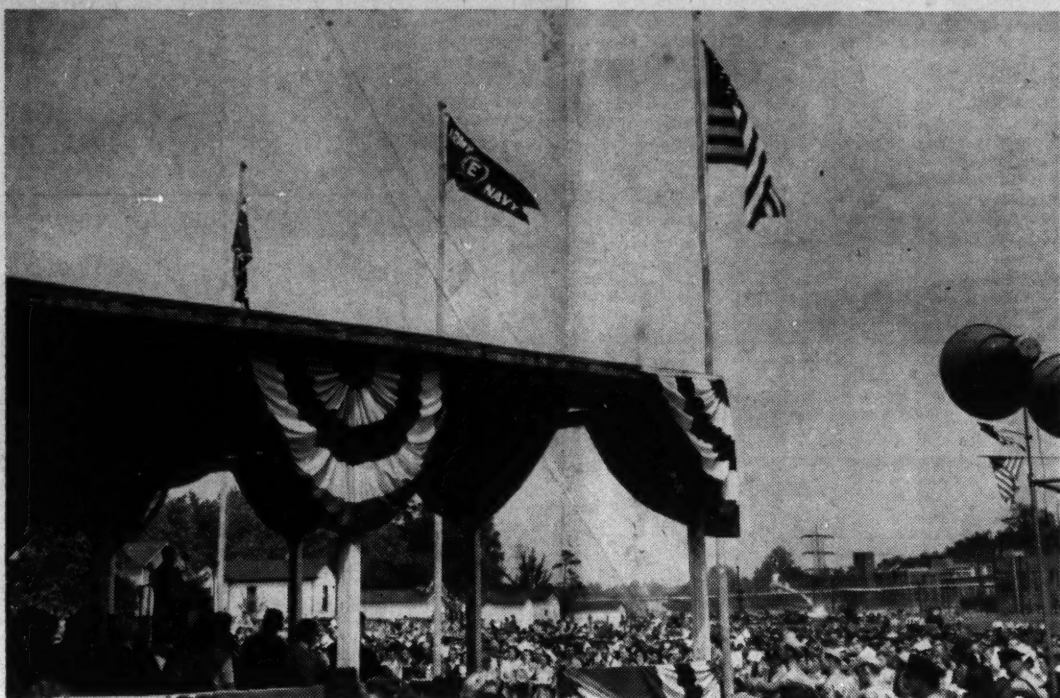

The Senate Finance Committee, after less than three hours of deliberation, voted 13 to 6 for the principle of the Ruml Plan to abate 1942 taxes completely and put all taxpayers on a fully current basis. This Committee action seems likely to upset the House-approved CIO-sponsored Forand Bill which would have abated only the 6 per cent normal tax and the 13 per cent first bracket surtax.

Surgical Dressing Class Met Tuesday

The rain interfered with the attendance at the Surgical dressing room at White Oak, Tuesday night, but the twenty-one that did come turned out a surprising number of dressings.

As it stands now, the first Tuesday night in each month, Carraway Memorial church will assume responsibility for the attendance; Print Works has agreed to take the second Tuesday night; Sixteenth Street Baptist church the third Tuesday night; and Revolution the fourth Tuesday night in each month—but everybody is urged to come any and every Tuesday night or all day Wednesday.

Those working Tuesday night were: Mesdames R. C. Honeycutt, W. J. Stewart, M. M. Moore, J. O. Wheeler, Millard Leonard, Garland Flintom, Frank Clark, W. J. Pennington, R. H. Armfield, R. L. Clapp, Jewel Martin, and Misses Phronie Blake, Agnes Matthews, Anna Motz, Louise Hester, Betty Paris, Marjorie James, Maxine Lowe, Marine Hester, Lillian Tilley and Minnie Fields.

"E" Pennants Fly for Proximity Mfg. Co. and Revolution

At the top are shown the two Army-Navy "E" pennants, awarded respectively to Proximity Manufacturing company and to Revolution Cotton Mills, flying from their flag poles beside the American flag, as a throng of employees and others looked proudly on during the presentation ceremonies here on the 14th of May. In background is shown part of the Print Works plant.

Second picture from the top shows a group of notables on the platform, who are, from left to right: Col. Woodward, Gov. Broughton, "Maj." L. P. McLeander, Congressman Carl Durham, Gen. Junius Jones, Col. Robert T. Stevens, Lt. Huger S. King, John H. Murphy, Jeffie L. Oakley, Columbus F. Brooks and William F. Loman.

Third picture shows the group of forty usherettes who served during the ceremonies. They are representatives from each of the four mills.

Bottom shows a part of the vast throng of thousands of employees and others who were present when the pennants were received.

Ripples From Haw River

Pvt. Cecil S. Woods stationed at Avon Park, Fla., is spending a 10-day furlough here visiting his wife.

Mrs. Ralph Pearson recently underwent a tonsillectomy at Dr. McPherson's hospital in Durham.

J. Hunter Jones won a War Bond given at a drawing at the Druggist convention on May 19th at Greensboro.

Mr. and Mrs. Roy Madern and family of Burlington spent the week

end with Mrs. Madern's mother, Mrs. Bertie Montgomery.

Mr. and Mrs. Luke Trollinger have as their guests, Mr. Trollinger's mother, Mrs. Roxie Trollinger of Asheboro.

The following Haw River girls received their certificates from Elton College Commercial school on May 24th: Misses Eleanor Neese, Mattie Lee Beauford, Lovenia Swink and Betty Jean Hendry.

Miss Virginia V. May of Elton College visited Miss Eleanor Neese last Tuesday.

Miss Mary Frances Williamson gave a handkerchief shower, Tuesday evening, May 20th honoring Miss Ida Jones who leaves Wednesday, May 26 for Arlington, Va., where she has accepted a position as Jr. Clerk, Signal Corp. Dainty sandwiches and Coca-Cola were served to the following:

Card of Thanks

The family of N. B. Martin wishes to acknowledge with grateful appreciation the many kind expressions of sympathy and many acts of kindness during their recent bereavement.

Misses Ida Jones, Mary Ellen Hayes, Mary Frances Williamson, Louise Gillespie, Mesdames Morris Barnett, R. P. Neese, H. B. Collier and R. M. Montgomery.

Industry Cuts War Cost Two And One-Half Billion

Savings Made Between Period of April 23, 1942 To March 31, 1943 Reports War And Navy Departments and The Maritime Commission

PROXIMITY HAPPENINGS

Lt. P. M. Carruthers, public relations officer of the Army Air Corps at Erskine college, Due West, S. C., visited his parents, Mr. and Mrs. J. T. Carruthers, Sr., 1212 Fairview street, over the week end.

Rev. Loman Speaks To Proximity Club

The Proximity Community Club met in the club room of the welfare department on Tuesday evening at seven-thirty o'clock and in spite of the steady downpour of rain a good group was present.

The President, Mrs. J. D. Scott, presided and the meeting opened with the hymn, "The Old Rugged Cross".

Rev. Harold Loman spoke during the devotional period and was listened to by a most receptive audience. He chose the portion of scripture, "Seek Ye First, The Kingdom of God", and impressed his hearers the necessity of keeping this ever before them in their daily lives.

During the business meeting the club voted to purchase a Pressure Canner to be used by members of the club in their canning this summer. The members also voted to discontinue the serving of refreshments for the duration.

Special music for the evening was piano selections by Misses Audrey and Dawn Coleman of Print Works. They each gave a solo number and closed their program with a duet. Both the musicians showed natural talent as well as training and the audience was delighted with their music.

Mrs. Ira McQueen was elected Secretary of the club to fill the term of Mrs. Edward Hutson, who expects to join her husband who is with the U. S. Army.

Mrs. H. M. Angel and Mrs. W. K. Jordan were appointed as a program committee for the June meeting which will be on the 22nd.

At the close of the meeting the committee in charge, Miss Richards, Mrs. H. B. Ritter and Mrs. J. M. Aldridge served refreshments.

SAFETY and WAR

It is very likely that few of us have considered the armed forces as being particularly Safety-minded. Fighting a war is such a hazardous business that on first thought it might seem that there is no place for Safety. But if we take a good look at some of the army, navy, and air corps practices we will find that this is not the case.

Steel helmets, very much like those worn by the plant air raid wardens, were used by fighting men 500 years ago. These helmets usually had a visor which could be pulled down to protect the face, and since safety glass had not yet been invented or even thought of, a number of holes were punched in the visor so that the fighter might see his opponent. Such a visor was really the grandpappy of our industrial goggles.

Armor for naval gun turrets, army tanks, and aircraft is well known as protection for fighting men on land and sea and in the air. It is the armor or safety guards on American airplanes that bring back the crew with their plane after the unarmored Zero has been shot down.

The marines on Guadalcanal have practiced Safety when they use their helmets to dig fox holes, into which they can crawl to avoid shrapnel when a bomb drops nearby. You can be sure that a marine takes this precaution without having a Safety committee member to remind him what to do.

The pilot's parachute and safety belt are carried for but one reason—Safety. If the plane is flying over water, his safety equipment will include a rubber boat, emergency food rations and some fishing tackle in case the food runs low before he is rescued.

Yes, industry can learn some real Safety lessons from our armed forces. If guards, goggles, and good practices were applied by war workers as thoroughly as our fighting men apply their Safety measures, we may be sure that industrial accidents would be decreased.

"Price reductions" on war contracts, refunds by contractors, and miscellaneous recoveries effected through renegotiation of contracts between April 28, 1942, and March 31, 1943, amounted to \$2,539,000,000, according to a report of the War and Navy Departments and the Maritime Commission.

The agencies, making a joint announcement through the OWI, said that \$995,100,000 of the total represents actual refunds by contractors and \$1,543,900,000 represents reductions in contract prices. "Through the productive genius of American management and labor," these "price reductions are being effected voluntarily by business through the contracting officers in the renegotiating agencies of the services," the announcement stated.

To indicate the savings to the government these agencies included the following reductions in a long list of war materials and equipment:

Bomber airframes, 32 per cent.
Fighter airframes, 14 per cent.
Automatic pilots, 24 per cent.
Human parachutes (assembly), 22 per cent.
Generators, 17 per cent.
Sulphadiazine, 48 per cent.
75-mm. tank guns, 28 per cent.
20-mm. anti-aircraft cannon, 34 per cent.
105-mm. H.E. shells, 22 per cent.
Steering gear, 25 per cent.
50 calibre anti-aircraft machine guns, 30 per cent.

These remarkable savings in production costs are evidence not only of the success of American industry in reducing unit costs through mass production but also of the sincere efforts of the industrialists to reduce to a minimum the financial burden of the war upon the American people.

Electronic Device Measures Distance Through Heavy Fog

The Army and the Navy, having partially lifted the veil of secrecy in their joint statement, some of the story of radar can now be told.

Radar is the electronic device which locates planes and ships far beyond man's former "vision" even in fog, darkness, and other adverse conditions. In operation, radar sends out radio waves which are reflected back to sensitive receivers when a ship or plane enters the area which the radio waves cover. Returning waves are then plotted, and by a complicated system of calculations, officers determine the position, direction of travel, and speed of enemy planes or ships. This information is then relayed to interceptor forces.

The existence of radar has been known for years. Industrial engineers and scientists as early as the twenties were actively engaged in the development of tubes, circuits, and apparatus for the very high frequencies which form the basis for present-day radar. With such experience added to manufacturing skill, one large electrical manufacturing company was able to start building radars long before Pearl Harbor, and is now making them in its factories for installations on ships, and on the ground. Many of the same men and women who used to make broadcast station transmitters and home receivers are now at work on this vital device, and parts are being made in other factories which formerly made electrical products for the home.

Vital areas in the U. S. defense system have been equipped with the devices which are also at work with our fighting forces on land, sea, and in the air. The British version of radar, which they call the radio-locator, is credited with saving England during the aerial blitz of 1940 and 1941. Radar now stands guard at many danger points along United Nations frontiers and at sea, warning of the coming of aerial and seaborne enemy forces.

W. O. Baby Clinic

John Thomas Rumley and Richard Clark Cofer were new members at the White Oak Baby Clinic Wednesday. Others present were: Doris Jarrett, Jean Gillie, Charles Rhew, Dianne Staley, Kelly Evans, Kelly Pinkleton, Marian Murray, Dewey Heath, Dianne Crisco, Julia Pickard, Shirlou Hepler, Gene Hepler, Gene Haynes, Janice Vaughan and Frankie Sue Vaughan.

Cannot Afford to Underestimate the Enemy

The war news looks more and more encouraging. With the American forces rapidly gaining momentum, our enemies are beginning to realize the extent of their blunder in ever thinking they could conquer the world. This realization may bring about any number of results. It is entirely possible that in Europe such demoralization will set in that the war in that section of the world will end sooner than even the leaders in those countries realize. Your editor, however, feels that it would be a serious mistake if we in the allied nations were to plan other than for another year of European warfare. Overconfidence can be as big a mistake with us as it was with the axis in the early stages of our participation in the war. The allies have frequently erred by underestimating the strength of the enemies. The enemy unquestionably erred by underestimating the strength and ability to develop and produce by the United States. We can again err by underestimating the strength and the morale of our European enemies.

Certainly, much damage has been done in Germany and Italy by the incessant bombing. There is little doubt but that the wholesale destruction has done much to the nerves and the morale of the people of their nations. On the other hand, we must not lose sight of the fact that we do not know truly what reserve strength the axis has. From a manpower situation on the industrial front, they are far from weak, as they are using as slaves the manpower of the conquered countries. We also cannot overlook the fact that the German people in particular have been made to believe that their only hope of any kind rests in victory by the axis and that death itself is better than victory by the allies.

We sincerely hope that the enemy will soon fold up and that unconditional surrender is not far in the future, but that hope should not for one minute cause us to let up in full preparation to fight and produce for a war which may last a year or more.

We must also remember that we have not scratched the surface in our comeback in the Pacific and that even though the war in Europe is quickly won, it will require concentrated effort of many months to completely defeat the Japs.

The whole idea behind this editorial is to discourage overconfidence and to plead for wholehearted effort on the part of all of us to go to the limit in producing those things our armed forces will need to guarantee 100 percent victory as quickly as possible.

We cannot afford to underestimate the enemy.

Reading and Writing - - -

Let us forget May 10, 1933, the Nazis burned the books of the world's greatest writers to signalize the death of culture. Today, in the U. S., the book is on the list of "Books Are Weapons in the War of Ideas" and commemorates the day by working for the widest possible distribution of the world's best books.

It looks as if the small town is coming into its own again. It wasn't so many years ago when books that expressed the frustration of living in a

small town—books like "Winesburg, Ohio," "Babbitt" and "Spoon River Anthology"—were all the rage. Now the picture has changed. We're learning there are a lot of fine things about life in a small town; that, in fact, the town way of life is what our country is fighting to preserve.

We have only to take a look at some of the recent books to see how true this is. Berry Fleming's novel, "Colonel Effingham's Raid," and William Saroyan's "The Human Comedy," both featuring typical small communities, have been extremely popular Book-of-the-Month Club selections. And no doubt "Colonel Effingham's Raid" will be as successful as "The Human Comedy" has proved.

Another book of this trend, soon to be a motion picture, is "Happy Land" by MacKinlay Kantor. This is a simple and beautifully told story about a typical small town, and about Lew Marsh who ran the town's most popular hangout—Marsh's Drug Store. A Lew's son, Rusty, joined up with the

U. S. Navy early, and he was one of the first casualties. When Lew Marsh learned his son was dead, he brooded about it. Why? he kept asking himself, why had it happened to Rusty? It wasn't fair.

Then one day he had a caller. The caller was his own grandfather, and he was most unexpected, since he had been dead for twenty years. Grampa, a Civil War veteran, had come back for the purpose of talking a little understanding into his grandson. And it was through him Lew realized that "As long as kids can play Indian in the corn . . . as long as American boys can be Boy Scouts, as long as they can eat ice cream, as long as they can do a good turn daily, as long as they can play football, or have a picnic in Briggs' Woods . . . it'll be worth while."

A good gift for a soldier friend is "As You Were," a pocket-size volume of some of the best in American prose and poetry, edited by the late Alexander Woolcott. It's a wise idea for a soldier to carry a book around with

Mote Cloth by Picker

- Ten Points
1. You cannot bring about prosperity by discouraging thrift.
 2. You cannot strengthen the weak by weakening the strong.
 3. You cannot help small men by tearing down big men.
 4. You cannot help the poor by destroying the rich.
 5. You cannot lift the wage-earner by pulling down the wage-payer.
 6. You cannot keep out of trouble by spending more than your income.
 7. You cannot further the brotherhood of man by inciting class hatred.
 8. You cannot establish sound security on borrowed money.
 9. You cannot build character and courage by taking away man's initiative and independence.
 10. You cannot help men permanently by doing for them what they could and should do for themselves.

—Land O'Lakes News

"A new baby brightens up the home," says a writer. Sometimes the lights are on all night, we've found.

Modern Girl: A vision in the evening and a sight in the morning.

The colonel was lecturing a class of incipient officers. "A 40-foot flagpole has fallen down," he said. "You have a sergeant and a squad of ten men. How do you erect the flagpole again?"

him when he's on leave. Woolcott counsels. He discovered that in the last war. It seems that the M. P.'s in Paris were always accusing the soldiers of being A.W.O.L. On one memorable occasion, however, Woolcott spent a whole evening in Paris without being stopped. He was carrying a book under his arm. After that he always carried one, and was never stopped again. It was apparently unthinkable to an M.P. that a bookish soldier could be on the loose.

The candidates thought, then offered suggestions about block-and-tackle, derricks, and so on.

"You're all wrong," replied the colonel. "You'd say: 'Sergeant, get that flagpole up!'"

An old woman at the Ulster frontier was asked if she had anything to declare. No, nothing at all. But what was in the bottle? Oh, only holy water from Lourdes. The customs officer pulled the cord.

"Whisky it is," said he.

"Glory be!" said the offender. "A miracle!"

Magistrate: "You cannot drive now for two years, for you're a danger to pedestrians."

Defendant: "But your honor, my living depends on it."

Magistrate: "So does theirs."

Pictures Taken At Army-Navy E Presentation Shows Part Of Huge Program

LIFTED TO THE BREEZES—Above is shown the Army-Navy "E" pennants being lifted to the breezes by the Greensboro Home Guard, who were present in full uniform for this occasion.

RECEIVES PENNANTS AND CONGRATULATIONS—At left, above, Mr. Herman Cone, president of the Proximity Manufacturing company and Revolution Cotton Mills, is shown receiving the pennants and congratulations from Col. Robert T. Stevens, United States Army, who made the presentation.

Left, two members of the Greensboro Home Guard prepare to raise Old Glory, as the crowd looks on. Above right, shows Gov. J. Melville Broughton delivering the address of welcome.

Proximity Surgical Dressings Room Is Moved To Bungalow

Next Monday, May 31, the loyal group of workers will meet at the bungalow at 7 p.m. to make Surgical dressings for the Red Cross. Since March 8, when the room opened in the club room of the welfare depart-

ment, there has been a good attendance each week but as summer arrives it was necessary to find a cooler spot and the bungalow was the perfect solution to the problem.

The quota for the Proximity Red Cross dressings room is at least 3000 surgical dressings each month and so far we have not reached our quota. This is not a duty for a few members of the community but a great opportunity for every member. Arrange-

ments have been made to have the room open at the following times: Monday 7-9 p.m.; Wednesday 10-12 a.m. and 1-4 p.m. and Thursday 7-9 p.m. The Wednesday morning hours were especially arranged for those who work on the second shift and so far have not had an opportunity to contribute their share to this worthy and important project.

Don't forget the hours and the place.

SPEAKING OF HEALTH

By DR. VICTOR G. HEISER
Medical Consultant Nation Association of Manufacturers

THE DIFFERENCE IS IMPORTANT

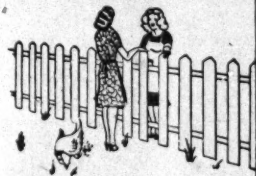

Many diseases have just one cause, for example typhoid fever or malaria. Some illnesses, however, may result from numerous causes. Whenever we have a headache we put the blame on something we ate the night before, or on the late hour we went to bed, or on the noise at the party we attended. If it is a lame back, of course, we charge that to the chair we lifted, or the position in which we presumably slept during the night, or the open window which caused a draft. Other ailments are similarly explained. We tend to look back to the recent past in search for a single incident to explain the pain or ache. We fail to realize that even with inner ailments a number of different factors, both internal and external, have probably been at work.

During the past century particularly, physicians have been impressed with the human differences in susceptibility to disease, differences in powers of resistance, differences in completeness and rapidity of recovery from disease or injury. Physicians have had to learn, for instance, why one child exposed to measles becomes ill and the other remains well; why active symptoms of other diseases become evident in some persons and skip others similarly situated; even why a moderate drinker develops hardening of the liver, while a much heavier drinker escapes; why the members of one family live to eighty or longer, while another family living under the same conditions has a much shorter life span. Obviously, there are many internal as well as external differences in persons. Each person is different from all others. A distinguished physician was once asked why he worked so hard. His answer was short: "We are a short-lived family. To accomplish anything I must work so much harder and longer hours than my associates."

The answer was sound. Heredity decides many things, even ability to make an early recovery from disease, to avoid certain diseases, and to live to a ripe old age. Stock-breeders have known these facts for a long time. That is why they have been careful in crossing breeds. Similar care on the part of men and women would result in a healthier population, in a longer life-span for many as yet unborn. The differences in humans are important, and the proper matching of these differences would mean much for the human race. Many believe that if a woman has diabetes or comes from a diabetic family she certainly should not marry a man who is a diabetic, for their offspring, if any, will be under the hazard of developing diabetes. The stock-breeder seeks expert advice. Men and women contemplating marriage should certainly do the same, with frankness and honesty, and with a determination to face the facts squarely.

THIS BUSINESS OF Living

BY SUSAN THAYER

CHICKENS AND GARDENS

The long green rows in my garden are a little higher each day now and my neighbor's chickens are growing just as lustily.

"Tch, tch," exclaimed great Aunt Matilda the other day when I took her out to admire the results of my labors and she noticed the chickens stratching contentedly for bugs just over the fence. "There's the making of trouble here. A garden on one side, chickens on the other!"

"The fence is good," I assured her "and my neighbor is very sensible."

"But some day one of those chickens might get under the wire or somebody could leave a gate open . . ."

The picture of what would happen was so vivid the old lady didn't need to say any more.

"Yet plenty of chickens and plenty of gardens are both needed this summer," I continued, "and we're both doing this extra work in order to help meet the food shortage and so in the end help win the war."

"I hope you'll both remember that if one of those chickens ever does get over here and scratches up some of your plants. It's a funny thing," the old lady continued in her philosophic way, "how well-meaning people forget the big issues when something annoys them personally. That's what's happening in war plants and mines when the workers, who are probably just as interested in winning the war as the men in managerial positions, stop work in order to get their own way about something. They get so mixed up by their own emotions about some petty thing that they overlook the fact that the tanks or planes or guns they're working on are needed desperately overseas, perhaps by their own sons or brothers."

"We're all in this thing together—we Americans. And the more united

we are in our work and in our thinking and planning for postwar reconstruction, the better it will be. We want the same big things but we're bound to differ about how to get them. But let's not quarrel! If Mary's hens should get into your garden, she must fix her fence, of course. But don't hate Mary, because you're working for the same great cause. And if some one else has a view of the war problems different from your own, talk about it calmly. Remember, one of the advantages of living in a free country is that you may grow what you please and talk as you please, as long as you don't injure anybody else!"

LT. BENJAMIN CONE

Lt. Benjamin Cone, above, former official of the local mills, attended the "E" ceremonies as an official representative of the Navy Department, addressing the group briefly.

PRESENTS PINS—Lt. Huger S. King, of the U. S. Navy, above, left, is shown pinning the "E" emblem on William F. Loman of White Oak. Lt. King presented emblems to the four oldest workers in point of service in the mills. They were: John H. Murphy of Proximity; Jeff L. Oakley of Revolution; Columbus F. Brooks of Proximity Print Works, and Mr. Loman of White Oak. Mr. Loman accepted the emblems in behalf of all employees.

VICTORY GARDEN NEWS

In the course of your gardening if you find the undersides of leaves covered with tiny green, pink or dark colored insects which seem to move in a jerky motion and each with a tiny bill or snout stuck into the surface of the leaf or tender plant stem, you will undoubtedly have come upon an infestation of aphids. Of all the sucking insects they are the most destructive because they come in such numbers unless checked by prompt spraying. Like the 5th column of war time they work quietly, and only careful search reveals them at all.

Aphids attack almost every type of plant and flower. They get on the young cabbage plants and cause them to become gnarled and crooked. The same type of aphid is found on cauliflower, kohlrabi, kale, radishes, brussels sprouts, turnips and similar garden vegetables. The pea aphid swarms upon the pea vines, and not only binds the crop by draining it of its precious sap, but causes gnarling and unproductive pods due to an irritation set up by their saliva. They even attack the potato crop, and when potato aphid strikes, it reduces the yield decidedly. Tomatoes which are close relatives of the potato plant also suffer from aphid infestation and scientists claim to have found in the neighborhood of 25,000 individual aphids on a single tomato plant.

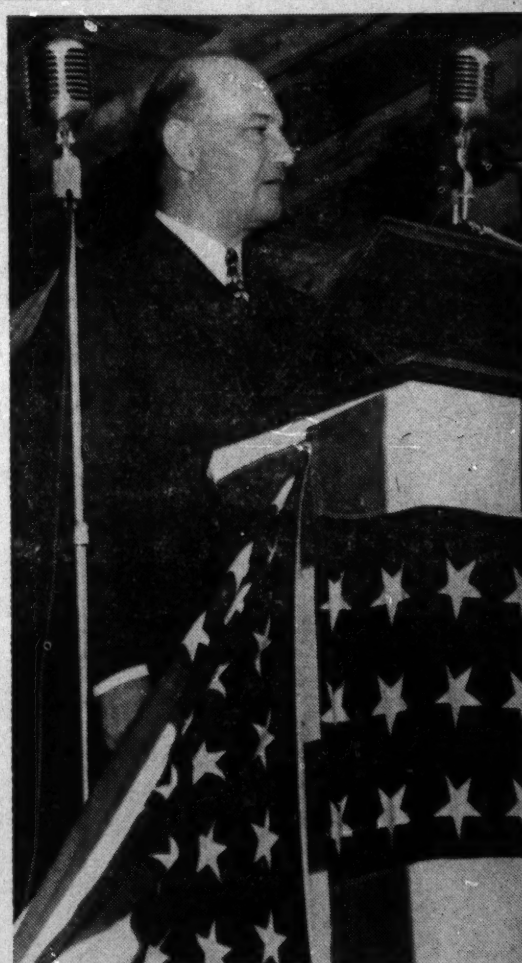

To make a spray for the control of aphids, you should put a teaspoonful of Black Leaf 40 in a gallon of water and add enough laundry soap to make suds. You may ask why the soap is added to the spray. The explanation goes back to a rather difficult scientific reason, but it all comes down to the fact that water spreads out more rapidly and covers a surface more thoroughly when it contains soap. You might say that "water is wetter" when soapy.

There are certain plants which will be found exceedingly difficult to spray. For example the cabbage leaf when covered with aphids curls up and forms a cup with the aphids inside. The same happens with potato leaves and with other plants. The beginner who comes along with a sprayer and shoots only "as the rain falls" will do practically no damage to the aphids hidden away under their protecting roof of curled up leaves. Like a true 5th columnist they bide their time. The spray must wet the aphids if it is to kill them.

The reason so much emphasis is put on aphid control in the Victory Garden is because of the way these insects multiply and increase without the gardener being aware of it unless he is watchful and knows what to look for. The little green insects seem quite harmless in the beginning. They are tiny—there are only a few of them to start with and because they do not run around they seem half dead when you first observe them.

However they are very busy—Each aphid adult gives birth to living young and the crop is about 8 to 10 young per day. In two weeks these offsprings are sufficiently grown to begin in turn giving birth to baby aphids—Mating is not necessary with these pests. It is readily seen that a very few aphids can start an infestation that can grow to dangerous proportions in a couple of weeks.

Spray! Spray! Spray! Especially spray the "seed crop" of aphids before they have time to multiply themselves by hundreds each. Here if ever is exemplified the ancient adage "a stitch in time saves nine."

ACCEPTS PENNANTS—Above is shown Mr. Herman Cone, president of Proximity Mfg. Co. and Revolution Cotton Mills, who accepted the pennants "with a sense of pride and responsibility—the responsibility not only to maintain production records of the past, but to improve on them in the future."

DISPLAY PENNANT—Above, left, is shown Ruby Elder and Sallie Stone-man, usherettes, who displayed one of the pennants to the throng. The other pennant was displayed by Catherine Caviness and Ida Brooks.
